

XLS
Enterprise Library System

Key Features:

- 355 to 465 cartridge slot capacity
- Supports up to 20 LTO 4 and LTO 3, FC and SCSI drives
- Provides capacity up to 372 TB, uncompressed (LTO 4)
- Up to 1.7 TB/hr native transfer rate, uncompressed (LTO4)
- Native Fibre Channel or SCSI interface
- 15" color touch screen for local control
- Scalable, modular architecture
- Available for HP NonStop™ and Open Systems

TSI XLS

Enterprise Library System

The TSI XLS Enterprise Library System's modular design delivers high levels of storage density and efficiency.

The XLS combines two distinct modules to deliver high-density, cost-effective and flexible systems. The basic configuration modular design allows you to start with 355 tapes and grow in easy increments to over 2585 tapes as your storage requirements grow. The Library Resource Module (LRM) is a complete self-contained library and forms the base unit for larger systems. The Memory Expansion Modules, MEMs, contain 535 or 1,075 tape storage slots in economical and very compact footprints. When additional storage is required, one or two MEMs can be easily added to each LRM.

The TSI XLS supports industry-leading LTO 3 and LTO 4, FC and SCSI tape drives. A native data transfer rate up to 1.7 TB/hr is achieved with LTO4 drives.

The TSI XLS Enterprise System delivers new levels of intelligence, density, flexibility, scalability and ease of use, coupled with a record of reliability and value.

SPECIFICATIONS

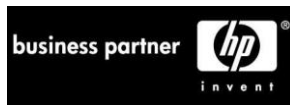

Capacity, native (uncompressed)	LTO 4 – 372 TB
Number of cartridge slots	355
Number of tape drives/types	1 to 20 drives
Height	77.5 inches / 1.97 meters
Depth	35.0 inches / 88 centimeters
Width	35.0 inches / 88 centimeters
Weight	1,202 lbs / 545 kilograms fully populated

Tributary Systems, Inc. is a technology solution provider to enterprise computing customers. Tributary develops and sells primary disk storage, data protection, backup storage, virtualization, site-to-site replication and disaster recovery solutions. Tributary is an acknowledged global leader in providing backup storage and data protection solutions for fault-tolerant, high availability, enterprise computing environments.

Tributary was founded in 1990 and is a Texas based company with its headquarters, development, integration, and test facilities in Bedford, Texas and software development and test facility in Austin, Texas.

Through its channels and direct sales organization, Tributary has served customers worldwide, predominantly in the banking, financial services, retail, telecom and healthcare industries. Tributary is a HP business partner and OEM supplier, IBM Solution Reseller (ISR) and Business Partner, Quantum® Value-Added Reseller (VAR), and Oracle® OEM partner.
